**Immunosorption Techniques: Fundamentals and Applications** Peter Mohr, Martin Hotzhauer, Gunter Kaiser

Immunosorption as a principle of molecular identification with high affinity and selectivity is now well established. This monograph reviews the actual state-of-the-art of separation methods and analytical techniques as immuno-affinity chromatography, immunoassays, botting and dot-blot procedures. To increase the understanding of these methods, an introduction into fundamentals of immunochemistry is given, and applications are illustrated by tables and representative protocols. This book should be suitable for scientists in basic and applied biosciences as well as for students and graduates, who want to increase their knowledge in this rapidly developing field.
