## Integer Programming and Combinatorial Optimization: 6th International IPCO Conference Houston, Texas, June 22-24, 1998 Proceedings (Lecture Notes in Computer Science)

This volume contains the papers selected for presentation at IPCO VI, the Sixth International Conference on Integer Programming and Combinatorial Optimization, held in Houston, Texas, USA, June 22-24, 1998. The IPCO series of conferences highlights recent developments in theory, computation, and applications of integer programming and combinatorial optimization. These conferences are sponsored by the Mathematical Programming Society, and are held in the years in which no International Symposium on Mathematical Programming takes place. Earlier IPCO conferences were held in Waterloo (Canada) in May 1990; Pittsburgh (USA) in May 1992; Erice (Italy) in April 1993; Copenhagen (Denmark) in May 1995; and Vancouver (Canada) in June 1996. The proceedings of IPCO IV (edited by Egon Balas and Jens Clausen in 1995) and IPCO V (edited by William Cunningham, Thomas McCormick, and Maurice Queyranne in 1996), were published by Springer-Verlag in the series Lecture Notes in Computer Science as Volumes 920 and 1084, respectively. The proceedings of the first three IPCO conferences were published by organizing institutions. A total of 77 extended abstracts, mostly of an excellent quality, were initially submitted. Following the IPCO policy of having only one stream of sessions over a three day span, the Program Committee selected 32 papers. As a result, many outstanding papers could not be selected. The papers included in this volume have not been refereed. It is expected that revised versions of these works will appear in scientific journals. The Program Committee thanks all the authors of submitted extended abstracts and papers for their support of the IPCO conferences.
