Engineering Haptic Devices: A Beginner's Guide (Springer Series on Touch and Haptic Systems)

Engineering Haptic Devices: A Beginner's Guide (Springer Series on Touch and Haptic Systems)

In this greatly reworked second edition of *Engineering Haptic Devices* the psychophysics content has been thoroughly revised and updated. Chapters on haptic interaction, system structures and design methodology were rewritten from scratch to include further basic principles and recent findings. New chapters on the evaluation of haptic systems and the design of three exemplary haptic systems from science and industry have been added.

This book was written for students and engineers that are faced with the development of a task-specific haptic system. It is a reference book for the basics of haptic interaction and existing haptic systems and methods as well as an excellent source of information for technical questions arising in the design process of systems and components.

Divided into two parts, part 1 contains typical application areas of haptic systems and a thorough analysis of haptics as an interaction modality. The role of the user in the design of haptic systems is discussed and relevant design and development stages are outlined. Part II presents all relevant problems in the design of haptic systems including general system and control structures, kinematic structures, actuator principles and sensors for force and kinematic measures. Further chapters examine interfaces and software development for virtual reality simulations.

From reader reviews:

Jose Reed:

Engineering Haptic Devices: A Beginner's Guide (Springer Series on Touch and Haptic Systems) can be one of your basic books that are good idea. Most of us recommend that straight away because this guide has good vocabulary which could increase your knowledge in terminology, easy to understand, bit entertaining but nevertheless delivering the information. The article writer giving his/her effort to get every word into pleasure arrangement in writing Engineering Haptic Devices: A Beginner's Guide (Springer Series on Touch and Haptic Systems) but doesn't forget the main position, giving the reader the hottest as well as based confirm resource data that maybe you can be one among it. This great information may drawn you into new stage of crucial considering.

Donna Cancel:

You could spend your free time to study this book this reserve. This Engineering Haptic Devices: A Beginner's Guide (Springer Series on Touch and Haptic Systems) is simple to bring you can read it in the playground, in the beach, train along with soon. If you did not possess much space to bring the particular printed book, you can buy typically the e-book. It is make you simpler to read it. You can save the book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.

Ronald Johnson:

This Engineering Haptic Devices: A Beginner's Guide (Springer Series on Touch and Haptic Systems) is brand-new way for you who has attention to look for some information mainly because it relief your hunger of knowledge. Getting deeper you onto it getting knowledge more you know otherwise you who still having small amount of digest in reading this Engineering Haptic Devices: A Beginner's Guide (Springer Series on Touch and Haptic Systems) can be the light food in your case because the information inside this particular book is easy to get by anyone. These books produce itself in the form and that is reachable by anyone, yes I mean in the e-book type. People who think that in publication form make them feel drowsy even dizzy this guide is the answer. So you cannot find any in reading a publication especially this one. You can find what you are looking for. It should be here for an individual. So , don't miss the item! Just read this e-book variety for your better life and knowledge.

Stephen Comerford:

That book can make you to feel relax. That book Engineering Haptic Devices: A Beginner's Guide (Springer Series on Touch and Haptic Systems) was multi-colored and of course has pictures on the website. As we know that book Engineering Haptic Devices: A Beginner's Guide (Springer Series on Touch and Haptic Systems) has many kinds or type. Start from kids until young adults. For example Naruto or Private eye Conan you can read and feel that you are the character on there. Therefore , not at all of book are make you bored, any it offers you feel happy, fun and relax. Try to choose the best book for you and try to like reading

that.
