Real Mathematical Analysis (Undergraduate Texts in Mathematics)

Charles C. Pugh

Real Mathematical Analysis (Undergraduate Texts in Mathematics) Charles C. Pugh

Based on an honors course taught by the author at UC Berkeley, this introduction to undergraduate real analysis gives a different emphasis by stressing the importance of pictures and hard problems. Topics include: a natural construction of the real numbers, four-dimensional visualization, basic point-set topology, function spaces, multivariable calculus via differential forms (leading to a simple proof of the Brouwer Fixed Point Theorem), and a pictorial treatment of Lebesgue theory. Over 150 detailed illustrations elucidate abstract concepts and salient points in proofs. The exposition is informal and relaxed, with many helpful asides, examples, some jokes, and occasional comments from mathematicians, such as Littlewood, Dieudonné, and Osserman. This book thus succeeds in being more comprehensive, more comprehensible, and more enjoyable, than standard introductions to analysis.

New to the second edition of *Real Mathematical Analysis* is a presentation of Lebesgue integration done almost entirely using the undergraph approach of Burkill. Payoffs include: concise picture proofs of the Monotone and Dominated Convergence Theorems, a one-line/one-picture proof of Fubini's theorem from Cavalieri's Principle, and, in many cases, the ability to *see* an integral result from measure theory. The presentation includes Vitali's Covering Lemma, density points — which are rarely treated in books at this level — and the almost everywhere differentiability of monotone functions. Several new exercises now join a collection of over 500 exercises that pose interesting challenges and introduce special topics to the student keen on mastering this beautiful subject.

From reader reviews:

Seth Sawyer:

In this 21st one hundred year, people become competitive in most way. By being competitive at this point, people have do something to make these individuals survives, being in the middle of the actual crowded place and notice by simply surrounding. One thing that often many people have underestimated that for a while is reading. Yes, by reading a publication your ability to survive increase then having chance to stay than other is high. In your case who want to start reading any book, we give you this Real Mathematical Analysis (Undergraduate Texts in Mathematics) book as basic and daily reading guide. Why, because this book is more than just a book.

Willie Hickox:

This Real Mathematical Analysis (Undergraduate Texts in Mathematics) are reliable for you who want to certainly be a successful person, why. The key reason why of this Real Mathematical Analysis (Undergraduate Texts in Mathematics) can be one of the great books you must have is actually giving you more than just simple studying food but feed you with information that maybe will shock your preceding knowledge. This book is usually handy, you can bring it just about everywhere and whenever your conditions throughout the e-book and printed people. Beside that this Real Mathematical Analysis (Undergraduate Texts in Mathematics) giving you an enormous of experience for instance rich vocabulary, giving you tryout of critical thinking that we realize it useful in your day action. So , let's have it and enjoy reading.

Corey Barksdale:

Is it anyone who having spare time then spend it whole day simply by watching television programs or just telling lies on the bed? Do you need something totally new? This Real Mathematical Analysis (Undergraduate Texts in Mathematics) can be the reply, oh how comes? A book you know. You are so out of date, spending your spare time by reading in this new era is common not a nerd activity. So what these guides have than the others?

Dan Flood:

Reading a guide make you to get more knowledge as a result. You can take knowledge and information from your book. Book is prepared or printed or created from each source that filled update of news. Within this modern era like now, many ways to get information are available for anyone. From media social similar to newspaper, magazines, science guide, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Do you want to spend your spare time to open your book? Or just in search of the Real Mathematical Analysis (Undergraduate Texts in Mathematics) when you desired it?
