Cogs, Caravels, and Galleons: The Sailing Ship 1000-1650 (Conway's History of the Ship)

Cogs, Caravels, and Galleons: The Sailing Ship 1000-1650 (Conway's History of the Ship)

COGS, CARAVELS AND GALLEONS traces the development of seagoing vessels from the traditions of late antiquity to the all-important emergence of the three-masted ship, undoubtedly the most significant innovation in the history of shipping before the steam engine. Without the three-masted ship the European age of exploration and expansion is almost inconceivable and there is no doubt that the subsequent evolution of the world would have been markedly different.

In recent years much original research has been done in this field, based on both documentary sources and archeology, but this is the first overall synthesis of the new material now available. The main chapters are devoted to the principal ship types, explaining the latest thinking on the characteristics of cogs, caravels, and hulks that have caused scholarly debate for decades.

There are also more general sections on essential background subjects like construction and guns and gunnery, as well as pertinent essays on the evidence -- from documentary sources, contemporary illustrations and archeology. All the contributors are foremost experts in their fields, but in presenting the fruits of their research at an approachable level, COGS, CARAVELS AND GALLEONS is a pioneering work in this area of maritime history.

Lavishly illustrated, this informative volume - the eighth in an ambitious series - includes over 50 black-and-white photos, 145 illustrations, and five tables.
