**Pediatric MRI (The Lippincott Williams & Wilkins MRI Teaching File Series)** Rosalind B. Dietrich  
Completely revised and updated for its Second Edition, this volume is part of the popular **Lippincott Williams & Wilkins MRI Teaching File Series**. The book presents 90 actual case studies that cover a wide variety of disorders seen in neonates, infants, and children and demonstrate the use of current MRI techniques to aid in diagnosis.

Each case study is illustrated with high-resolution MR images and presented in an easy-to-follow two-page spread. On the left-hand page are the images and a brief clinical history. On the right-hand page are concise descriptions of the radiographic findings, the diagnosis, and the pathology. This format is ideal for teaching readers how to interpret MR images or for everyday reference at the view box.
