Evolutionary Ecology: The Trinidadian Guppy (Oxford Series in Ecology and Evolution) Anne E. Magurran

This book celebrates the guppy's unique contribution to evolutionary ecology. Ever since Caryl Haskins described guppy populations as a 'natural experiment' because of the way predation pressure varies over a small geographical area, generations of researchers have been drawn to Trinidad to investigate evolution in the wild. The species continues to provide classic examples of natural selection in action and elegantly illustrates how ecology, evolution, and behaviour are interlinked.

Anne Magurran's account of the evolutionary ecology of the guppy integrates historical breakthroughs with new research in this fast-moving field. She reveals how guppies provided some of the first evidence of sperm competition and sexual selection, and how they continue to inform scientific thought on mating systems and cryptic choice. The consequences of variation in predation risk--as well as a host of other biotic and abiotic factors--are described and evaluated at all life stages from conception to death. The book discusses behavioural responses to ecological conditions alongside life history patterns. It examines the potential for ecological speciation and discusses new research into how reproductive isolating mechanisms become established in promiscuous mating systems. Conservation issues are also considered, both in terms of protecting the irreplaceable Trinidadian guppy system and in the context of invasion ecology. This timely synthesis of research into a species that has raised key questions in evolutionary ecology will be of great interest to graduate level students as well as professional researchers in the fields of behavioural ecology and evolutionary biology.

From reader reviews:

John Whetstone:

Do you one among people who can't read gratifying if the sentence chained inside the straightway, hold on guys this aren't like that. This Evolutionary Ecology: The Trinidadian Guppy (Oxford Series in Ecology and Evolution) book is readable simply by you who hate the straight word style. You will find the information here are arrange for enjoyable examining experience without leaving possibly decrease the knowledge that want to provide to you. The writer connected with Evolutionary Ecology: The Trinidadian Guppy (Oxford Series in Ecology and Evolution) content conveys thinking easily to understand by most people. The printed and e-book are not different in the content material but it just different in the form of it. So , do you nevertheless thinking Evolutionary Ecology: The Trinidadian Guppy (Oxford Series in Ecology and Evolution) is not loveable to be your top listing reading book?

Willis Newby:

Reading a book for being new life style in this season; every people loves to learn a book. When you go through a book you can get a lot of benefit. When you read books, you can improve your knowledge, mainly because book has a lot of information on it. The information that you will get depend on what sorts of book that you have read. In order to get information about your analysis, you can read education books, but if you want to entertain yourself you can read a fiction books, such us novel, comics, as well as soon. The Evolutionary Ecology: The Trinidadian Guppy (Oxford Series in Ecology and Evolution) provide you with new experience in looking at a book.

Pam Boyd:

Many people spending their moment by playing outside using friends, fun activity along with family or just watching TV the entire day. You can have new activity to spend your whole day by reading a book. Ugh, ya think reading a book really can hard because you have to use the book everywhere? It okay you can have the e-book, bringing everywhere you want in your Mobile phone. Like Evolutionary Ecology: The Trinidadian Guppy (Oxford Series in Ecology and Evolution) which is obtaining the e-book version. So , why not try out this book? Let's observe.

Robert Williams:

Is it anyone who having spare time after that spend it whole day by means of watching television programs or just telling lies on the bed? Do you need something totally new? This Evolutionary Ecology: The Trinidadian Guppy (Oxford Series in Ecology and Evolution) can be the reply, oh how comes? The new book you know. You are therefore out of date, spending your free time by reading in this brand-new era is common not a nerd activity. So what these guides have than the others?
