## **Solid Biofuels for Energy: A Lower Greenhouse Gas Alternative (Green Energy and Technology)**

Panagiotis Grammelis

Fossil fuels are widely used for electricity generation and heating, creating greenhouse gas emissions and other toxic pollutants, which should be minimised according to the most recent environmental legislation. The utilisation of solid fuels with biogenic origin could contribute to the minimisation of these emissions. Solid Biofuels for Energy presents the current status of the engineering disciplines in this specific area, providing an improved background on the energy exploitation options of solid biomass. Within this framework, all thematic priorities related to the solid bioenergy potential and standardisation, commercialised and emerging energy technologies, and quality of solid residues are presented. Special attention has been given to biomass co-firing with coal, since it has the highest potential for commercial application, while combustion and gasification are more promising for units of medium to small scale. This strong practical focus is evident throughout the book, particularly in discussions of: • international standards for solid biofuel specifications; • supply, cost and sustainability of solid biofuels; • technical issues and non-technical barriers in biomass/coal co-firing; and • biomass combustion and gasification characteristics. Solid Biofuels for Energy is an informative reference, written for researchers and postgraduate students working in the field of biomass. It can also be a useful guide for chemical and mechanical engineers, involved in the environment and energy production sectors.

### **From reader reviews:**

#### **Rudy Nixon:**

Book is usually written, printed, or descriptive for everything. You can learn everything you want by a guide. Book has a different type. As it is known to us that book is important point to bring us around the world. Next to that you can your reading ability was fluently. A guide Solid Biofuels for Energy: A Lower Greenhouse Gas Alternative (Green Energy and Technology) will make you to always be smarter. You can feel more confidence if you can know about every little thing. But some of you think which open or reading the book make you bored. It is far from make you fun. Why they could be thought like that? Have you looking for best book or ideal book with you?

#### **Frank Jorge:**

What do you with regards to book? It is not important to you? Or just adding material when you want something to explain what the ones you have problem? How about your time? Or are you busy man or woman? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? Every person has many questions above. They should answer that question since just their can do that. It said that about reserve. Book is familiar on every person. Yes, it is correct. Because start from on jardín de infancia until university need this specific Solid Biofuels for Energy: A Lower Greenhouse Gas Alternative (Green Energy and Technology) to read.

#### **Jacki Peters:**

The e-book with title Solid Biofuels for Energy: A Lower Greenhouse Gas Alternative (Green Energy and Technology) has a lot of information that you can study it. You can get a lot of benefit after read this book. This specific book exist new knowledge the information that exist in this e-book represented the condition of the world today. That is important to you to be aware of how the improvement of the world. This specific book will bring you in new era of the internationalization. You can read the e-book on your smart phone, so you can read the idea anywhere you want.

#### **David Gonzales:**

Reading a reserve make you to get more knowledge from that. You can take knowledge and information originating from a book. Book is written or printed or descriptive from each source which filled update of news. On this modern era like right now, many ways to get information are available for you actually. From media social including newspaper, magazines, science reserve, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to spread out your book? Or just trying to find the Solid Biofuels for Energy: A Lower Greenhouse Gas Alternative (Green Energy and Technology) when you required it?
